

# ASCENTOR

## Pre-fabricated mono-pitch chimney stack

The ASCENTOR model is a working chimney inside an aesthetic more traditional looking chimney stack. Available in many models and different finishes to meet the demands of your project and environment.

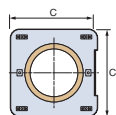

### TECHNICAL DATA

- > The ASCENTOR Chimney Stack can generally be installed in less than an hour without the need of any structural work to the roof trusses.
- > The chimney stack unit is lightweight and is easily man handled into position without the need of heavy lifting equipment or craneage.
- > The flashing plate is made to measure and guarantees an immediate and perfect water-tight seal to the roof.

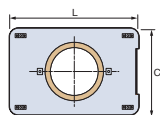

### Aesthetic choices

#### Choose the chimney model and diameter

##### Section

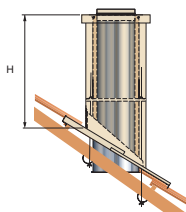

TCP = square  
Cx C = 370x370mm

TRP = rectangular  
L x C = 575x400mm

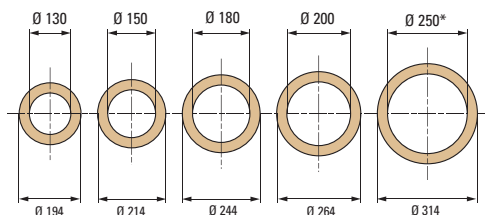

##### Height

Back height : H  
for 45° pitched roof

G = 1160mm  
TG = 1460mm  
TTG = 2500mm

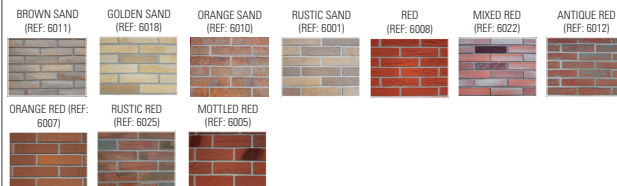

The ASCENTOR chimney stack unit comes complete with a pre-installed section of Therminox ZI chimney system.

\*diameters not available for the square version

vented cap

#### 3 Choose your flashing colour and pitch roof

terracotta  
c/w malleable skirt

dark grey  
c/w malleable skirt

# ZENITH

## Pre-fabricated ridge mounted & gable end chimney stack

The ZENITH model is a working chimney inside an aesthetic more traditional looking chimney stack. Available in different finishes to meet the demands of your project and environment.

### TECHNICAL DATA

- > The ZENITH Chimney Stack does not require the roof trusses to be strengthened or reinforced.
- > It comes complete with a designed flashing for the roof that ensures the finished construction does not leak. No additional on site flashings or up-stands are required.
